REFRIGERATOR

- Store between **2°C and 8°C (36°F and 46°F)** for up to 30 days
- Protect from light
- Do not shake

Best Practices

All Moderna COVID-19 Vaccine products should be:

- Stored at frozen temperatures until the expiration date. Use storage labels to help staff easily identify the correct product based on the recipient's age.
- Stored at refrigerated temperatures for up to 30 days. Use these tracking labels to identify when the beyond-use date for refrigerated storage has been reached. Vaccine should NOT be used after this date.
- Transported in a portable freezer, refrigerator, or container qualified to maintain the appropriate temperatures with a digital data logger to monitor the temperature for up to 12 cumulative hours.

Additional information on storing and handling Moderna COVID-19 Vaccine can be found in:
