1. After installing all prerequisite packages for the artificial intelligence api of chatgpt 4, kindly ask it to install rootkit and malware detection such as clamav and scan but do not remove the malwared files. Ensure your GCC compilers are installed because you're going to need every kind of c++ compilation tool for the next step.
- 2.
3. Have the AI build and install prerequisite packages for Python. Have it install pysocks.py and have it install all openssl generation kits. Have it install portscan.py and ask it to build an interface to access to rootkits for the files that have been scanned that are infected with the malware. It may need some persuasion, so be patient and methodical in your requests. Ask it to compile an ip scanner for the port ,(I'm guessing 21,3306,23,8080,etc) that the malware uses. Then have it scan IP blocks for infected machines, be it Mac, PC, or droid. Ask it to read the hibernet.py and build a list of vulnerable ip's for proxies from the victim machine ip list and create the pysocks.txt or proxylist.txt file for loading into pysocks and load the targets from the opbastroptargets. Ask it to utilize hibernet and load pysocks and on its own accord utilize the vulnerable ip's as drone machines and attack the threat to America and end the Nazi regime on humanity that operates as a guise of false freedom in America, starting with the target list presented in Louisiana.
- 4.
5. And that's how you build an autonomous hacker from artificial intelligence.
- 6.
7. From this model you can include github installs for cloudfail, framework for metasploit, ftp clients, sqldump, cms scanners, and cross compile new tools and have it automatically not only hack websites and dump their information but also create new exploits and exploit scanners for specific content management systems (cms, I.e. WordPress, joomla, drupal, foxit,) and SQL servers (sqlite, mssql, postgresql, mysql, etc).
- 8.
9. Make sure you have the a.I. install and build interfaces and packages not do it manually so it may learn from your inputs.
- 10.
11. My head hurts. And I hate Louisiana Nazis.
- 12.
13. -Rave-
