Abstract of Information Available

A total of 20 cultural items have been requested for repatriation. The 20 unassociated funerary objects are an incised ceramic beaker, a shell pendant, pieces of red ochre, and pieces of shell. These objects were removed from the following archaeological sites in Schuyler County, Illinois: Meyer Site (11SC1) and Jennings Site (11SC5) by John C. McGregor in 1954; Vincent Rock Shelter (11SC9) by Elain Bluhm in 1957; and an unknown site from which the incised beaker was later acquired by collector Harold W. Mohrman at an unknown date. The University of Illinois Urbana-Champaign is not aware of the presence of any potentially hazardous substances used to treat any of the cultural items.

Determinations

The University of Illinois Urbana-Champaign has determined that:

- The 20 unassociated funerary objects described in this notice are reasonably believed to have been placed intentionally with or near human remains, and are connected, either at the time of death or later as part of the death rite or ceremony of a Native American culture according to the Native American traditional knowledge of a lineal descendant, Indian Tribe, or Native Hawaiian organization. The unassociated funerary objects have been identified by a preponderance of the evidence as related to human remains, specific individuals, or families, or removed from a specific burial site or burial area of an individual or individuals with cultural affiliation to an Indian Tribe or Native Hawaiian organization.
- There is a connection between the cultural items described in this notice and the Miami Tribe of Oklahoma and the Peoria Tribe of Indians of Oklahoma.

Requests for Repatriation

Additional, written requests for repatriation of the cultural items in this notice must be sent to the authorized representative identified in this notice under **ADDRESSES**. Requests for repatriation may be submitted by any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that the requestor is a lineal descendant or a culturally affiliated Indian Tribe or Native Hawaiian organization.

Repatriation of the cultural items in this notice to a requestor may occur on or after December 14, 2026. If competing requests for repatriation are received, the University of Illinois Urbana-Champaign must determine the most appropriate requestor prior to repatriation. Requests for joint repatriation of the cultural items are considered a single request and not competing requests. The University of Illinois Urbana-Champaign is responsible for sending a copy of this notice to the Indian Tribes and Native Hawaiian organizations identified in this notice and to any other consulting parties.

SUMMARY: The USIBWC hereby gives notice that the *Draft Environmental Assessment (EA) and Finding of No Significant Impact (FONSI) for the Reconstruction of the Fort Hancock-El Porvenir International Bridge, Rio Grande Rectification Project, Hudspeth County, Texas* is available.

FOR FURTHER INFORMATION CONTACT: Elizabeth Verdecchia, Natural Resources Specialist, Telephone: (915) 832–4701, email: *elizabeth.verdecchia@ibwc.gov.*

SUPPLEMENTARY INFORMATION: The USIBWC is proposing to construct a new bridge section on the U.S. side of the Fort Hancock—El Porvenir International Bridge that would tie-in to the Mexican section of the bridge, in order to address structural and safety issues with the bridge. Pursuant to Section 102(2)(c) of the National Environmental Policy Act (NEPA) of 1969, as amended, and the USIBWC Operational Procedures for Implementing Section 102 of NEPA, published in the **Federal Register** September 2, 1981, USIBWC developed a Draft EA that analyzed the Action Alternative (Preferred Alternative) and the No Action Alternative. The Action Alternative—U.S. Side Rebuild to Same Profile would construct a new bridge section on the U.S. side to address with the structural integrity of the substructure and bridge deck. The new bridge section on the U.S. side would tie-in to the Mexican section of the bridge, which is in good condition. The new bridge section would generally match the existing bridge with regard to having the same height and width, similar roadway and sidewalk, but with an improved floodgate. Under the No Action Alternative, USIBWC would not construct a new bridge section, and the safety issues would not be addressed.

Potential impacts on natural, cultural, and other resources were evaluated. A Finding of No Significant Impact for the Proposed Action, based on a review of the facts and analyses contained in the EA. An environmental impact statement will not be prepared.
